If you're serious about your dream,
we'll take your dream seriously.
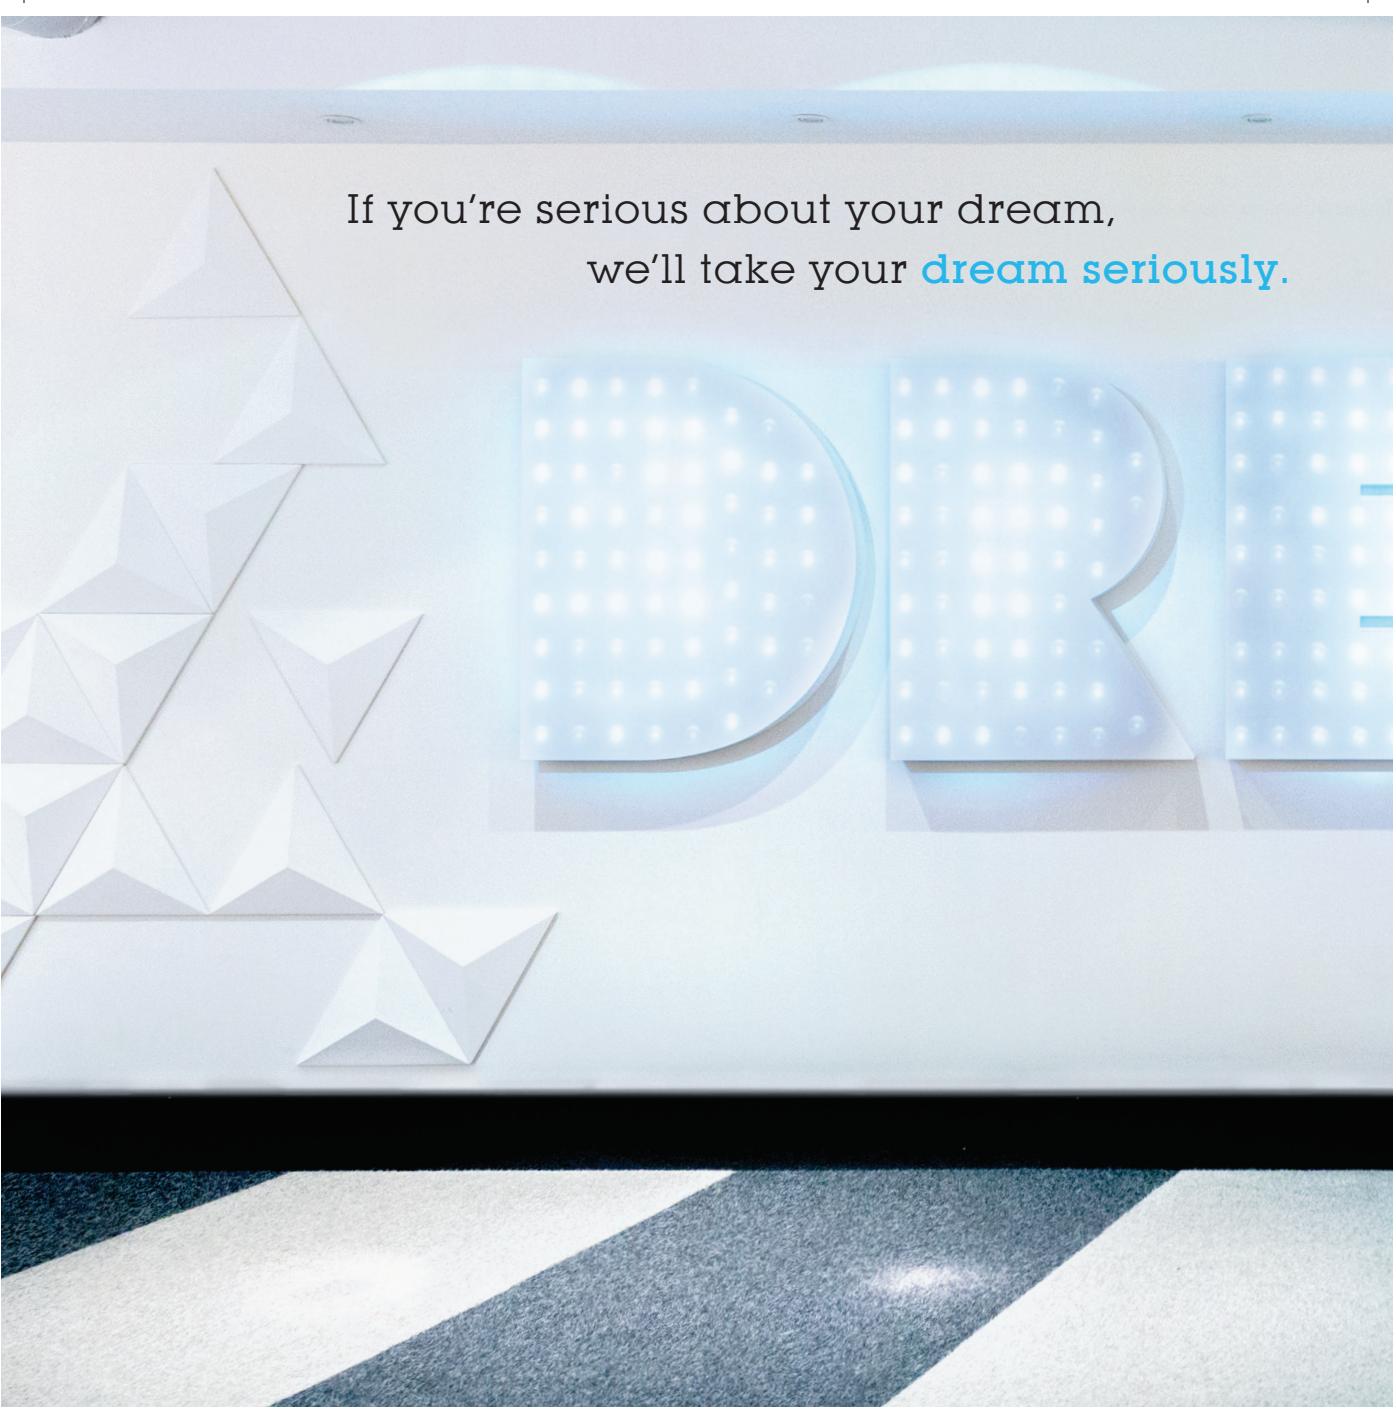

We empower and support individuals who are pursuing their dreams in creative industries – because it's those people who make our world amazing.

We're Different

When we began, we set out to offer something different in the world of education – providing real-world environments for students to hone their crafts.

Today, Full Sail University has evolved to serve the many facets of entertainment, media, art, and technology. We're a community united by the drive to create and the courage to be different.

MUSIC & Recording

Creating music professionally is something that millions of people dream about. And those who succeed are there because they've worked tirelessly and have made themselves indispensable.

Aspiring composers learn more than writing – they diversify their talents so they can understand different musical styles and study business essentials so they can market their work. Recording engineers get their hands on equipment and explore both the art and science behind a good track. Show producers explore the elements that come together for a riveting live experience, and they build those skills in real venues, with real performers.

Show Production

Full Sail grads have worked on 18 GRAMMY-winning Album of the Year releases over the past 25 years.

GAMES

Full Sail was one of the first schools to enter the gaming arena. Our programs are engineered to emulate the development studio experience – from the software and tools, to the projects, collaboration, and workflow.

We know game degrees aren't one-size-fits-all, so our programs take different paths depending on where you want to go – whether you're aspiring to bring environments to life or ready to dig into programming.

ART
& Design

Good design is something that can't be manufactured – it can only come from the minds of creative people. The goal of Full Sail's art and design programs is to encourage artists to embrace their eye for the original and guide them to a career path that's fulfilling.

Students in our degree programs build traditional skills like drawing and sculpting while getting familiar with digital tools and software. With programs that emphasize real-world experience and portfolio creation, they'll be armed with the skills to support the creative needs of clients and studios.

FILM
& Television
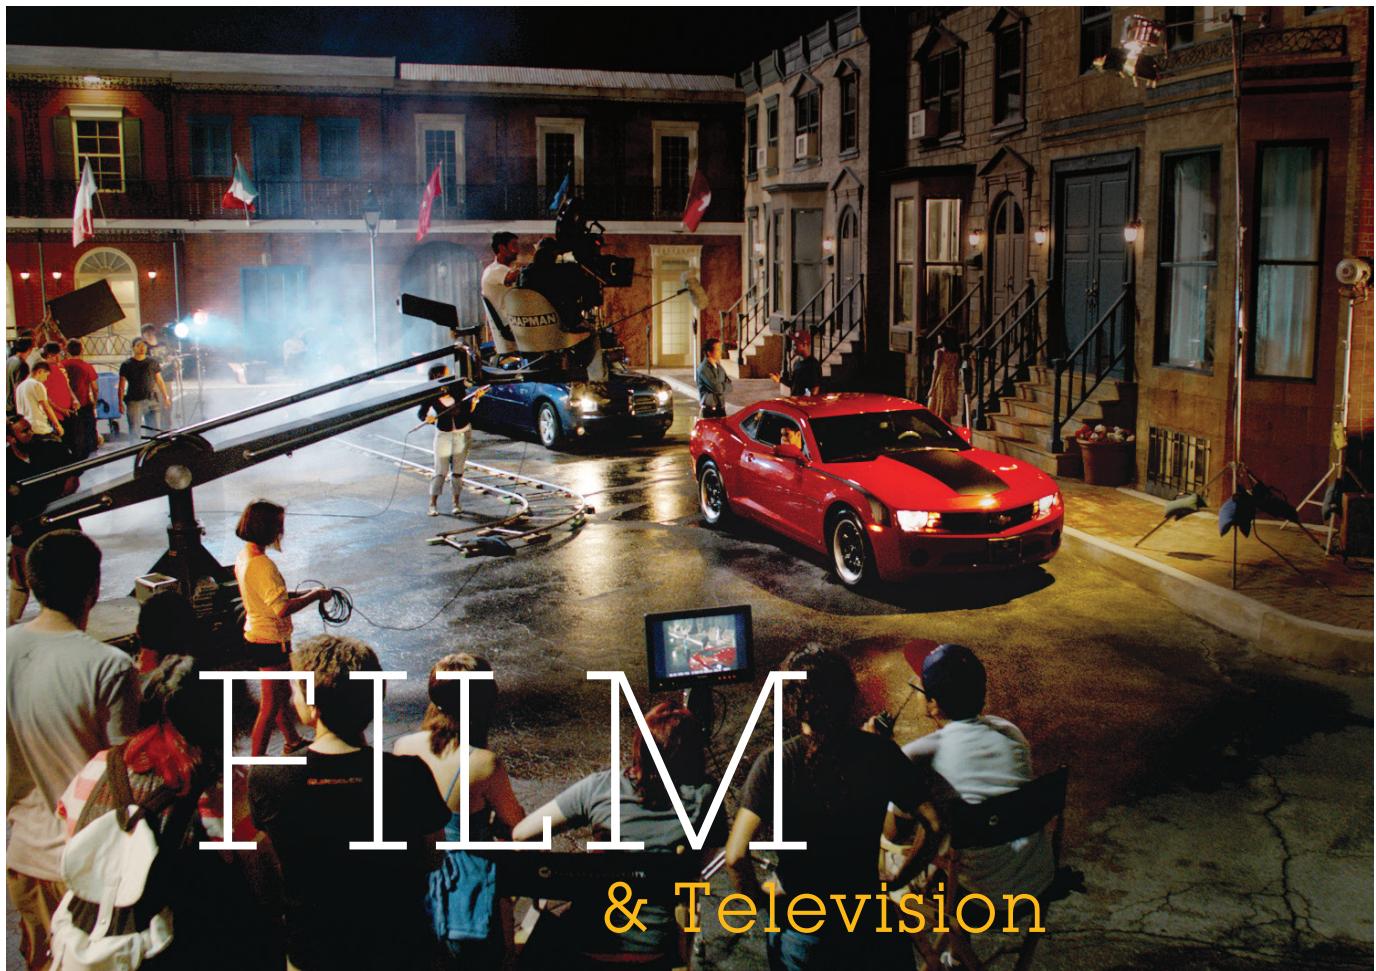

Viewers are craving content from seven seconds to 17 episodes and everything in between – and they have plenty of options. In order to get their attention, it's essential to understand what goes into a great story and an effective production.

When you study filmmaking at Full Sail, you'll build your skill set in an independent studio environment – regardless if you're learning online or on set. Your projects are real films that are produced, shared, critiqued, and pitched. This gives you content for a diverse portfolio to promote your skills, and the kind of experience that prepares you for the rapid pulse of the filmmaking world.

TECHNOLOGY

From the 24-hour news cycle to smart devices in our homes, the tech world's influence and innovations continue to grow. Our programs are equipped to adapt to technology's ongoing evolution as it happens – through our fast-paced, project-based educational approach.

You'll be crafting actualized projects in teams and environments that function like the real world – whether you're coding an application, problem-solving through simulation, or establishing a cloud network. And because our programs are fast-paced, you'll stay challenged and graduate earlier – which makes a big difference in such a dynamic industry.

MEDIA
& Communications

Career options in media and communication are more diverse and widespread than ever. Brands, businesses, and consumers seek captivating content, but it needs to pop in such a noisy world. Today's writers and storytellers require specialized skills and the flexibility to shift from page to platform.

Whether you're passionate about fiction, journalism, or the power of persuasion, the courses in your degree will show you the ins and outs of the channels that help the world connect. You'll build and broaden your talents through workshops and ongoing portfolio projects, and get specific insight on how to develop yourself as a communications professional.

The Full Sail
ADVANTAGE

Full Sail has a different approach to education, from accelerated programs to tuition that includes all books and lab fees.

Here are just some of the factors to consider:

Half the Time

Classes are offered monthly, so a degree that would normally take four years takes 24 months on average.

Cost of Living

Since you won't be in school as long, you'll need to fund fewer years of housing and living expenses during your education.

What's Included?

Normally books and supplies are a major educational cost. At Full Sail, these items are included in tuition.

Start Anytime

Full Sail's degree programs start every month, so you don't need to wait for fall to begin your education.

Come Back Anytime

You can return to Full Sail and take a current course within your degree program, on an available-seating basis.

Full Sail's Tuition is Locked

Unlike most U.S. universities, tuition is set for the duration of your program and doesn't rise from semester to semester.

Your Career

Through integrated career modules, you'll prepare for your future as part of your degree program. You will learn specialized skills related to job interviews, résumés, personal branding, and more.

Full Sail also has a dedicated Career Development department, with industry-specific advisors here to support your journey no matter where you are in your career path.

Projects and Portfolios

Our bachelor's degrees have seven integrated portfolio projects, instead of one single final project. This way, you can have multiple pieces of work to show what you have learned to prospective employers or clients after you graduate.

STEM Programs

Full Sail offers degrees in a variety of emerging fields, such as:

- Cloud Technologies
- Game Development
- Mobile Development
- Simulation & Visualization
- Software Development
- Web Design & Development

For more specific information, view the sections in this booklet for our Technology and Games areas of study.

Admissions Checklist

Use this checklist as a guide to what you'll need to enroll at Full Sail and to help keep track of submitted materials.

○ **Interview with Admissions Representative**

○ **Application**

○ **Application Fee**

○ **Seat Deposit**
($200.00 required for on-campus degrees only)

○ **High School Transcripts**
(required for undergraduate degree programs)

○ **College Transcripts**
(required for graduate degree programs)

○ **Verification of Language Proficiency**

○ **Signed Enrollment Agreement**

○ **Financial Guarantee**

○ **Copy of Identification**
(passport or government-issued I.D.)

**Any documentation not in English must be accompanied
 by a certified English translation*

Connect with us

International Student Society

With a mission that emphasizes friendship and diversity, the International Student Society (ISS) brings together students from around the world for social events, networking, mentorship, and more. It serves as a support system to international students as they adjust to life in the U.S., while introducing the entire Full Sail community to unique and diverse cultures.

CAMPUS & ONLINE
Degree Programs

Music & Recording

Students work in professional studios and labs to create soundtracks, albums, and more.

Games

From programming, to art and animation, to level design, students in these programs gain a firsthand look at the elements of game creation.

Art & Design

These degree programs combine art fundamentals with digital technology.

Film & Television

Students learn the art of filmmaking while becoming familiar with production technology.
